

# Accurate and Appropriate Clinical Documentation for Chiropractic Care

Attend this part of the KMC University Boot Camp for 4 CEUs or, better yet, find out how to attend the entire 18 hour event!

## Decrease compliance risk!

We know everyone hates to document but if you knew you were going to get paid for documenting would you still hate to do it? When you learn to document properly, you meet the standard of care and you get paid more.

Is your coding and documentation the best it can be? Do the changes and requirements make your head spin? Don't be caught unaware in the inevitable post payment audit process. Documentation and coding for the chiropractic office will be addressed including:

- General Record Keeping
- Evaluation and Management Documentation
- Clinical Decision Making
  - Treatment Planning
- Application of Medicare Guidelines
- Chiropractic Manipulative Treatment Documentation
  - Modalities and Procedures

Doctors, attend with your staff to bring everyone up to speed on the latest requirements on coding and documentation. Let this seminar be your guided tour through the confusing and complicated world of documentation and appropriate coding. Kathy will lead you and your team members through the most common and important principles of proper clinical documentation to reduce your exposure to compliance audits.

## About the presenter...

As a former ACA team member and staff contact for coding, Kathy Mills Chang learned about coding and documentation from the inside out from the people who actually created the codes and set the documentation guidelines. Her experience of more than 26 years in the profession includes coaching chiropractors, hands on training and lecturing around the country. Kathy has committed her time and effort in teaching not only doctors, but also their staff, more efficient ways to create financial ease in practice with stellar documentation and accurate coding in the chiropractic office.

**Atlanta, GA**  
November 15, 2008
